

Time line = Group Collaboration
3 weeks something.

All-FIGURES - CAMU - P

Finished
Re draw

Where
Captions - explanations of figure -

I Intro

II Experimental Description

Device Data collection
Probe

III Theory

History - who - why, & machines
what they are

Drift wave
Correlation - Book
changes -

IV Experimental results

complexity - physics
math
(find other process in nature with some complexity)

V Conclusion

VI Summary -

VII References - 30 - 40
Life car: i -

Langmuir probe

how used for measuring density
